

QuikStop IIS Pneumatic Control Handle

Product Features

The PanBlast™ QuikStop IIS Pneumatic Control Handle is an ergonomic deadman device, allowing an operator to safely operate the blast nozzle without a conventional hold down handle, thus reducing operator fatigue.

- ▶ Simple ball and wrist strap device.
- ▶ Works with standard twinline hose.
- ▶ Immediate pilot air shutoff if blast hose is dropped.
- ▶ Reduces operator fatigue.

Common Applications

- ▶ General abrasive blasting operations.
- ▶ Operations requiring extended blasting uptime.
