

## PanBlast™ AirFlo NPT Remote Control Handle - Pneumatic Type

*"Surface Preparation Is Our Business"*

Pan Abrasives manufacture and supply an extensive range of Remote Control Deadman Handles available in various configurations for both pneumatic and electrical operation.

The PanBlast™ AirFlo NPT Pneumatic Remote Control Handle operates as a bleed off style handle when supplied in pneumatic form. The AirFlo Pneumatic Handle is connected to the blast pot control valve using a twinline arrangement and when un-activated the pilot signal air from the control valve bleeds off at the handle.

When activated by the operator, the AirFlo Handle closes off the bleed orifice, which then allows the signal air to return to the blast pot control valve thus activating the blast pot.
