

## PanBlast™ Blast Suits and Gloves

*"Surface Preparation  
Is Our Business"*

### *PanBlast™ Blast Suits and Gloves*

PanBlast™ Blast Suits and Leather Blast Gloves are designed to protect the abrasive blasting operator from the dangers of re-bouncing abrasive, dust and debris created by the blasting action. They are particularly suited to applications using metallic abrasives such as steel grit and chilled iron grit.

The leather fronted blasting suits combine the toughness and durability of the leather covered front, with the lighter weight cotton back section. This design protects the operator while also keeping them cool.

Four (4) blast suit sizes are available, from small (S) to extra large (XL).
