

## PanBlast™ AirStop BSP Remote Control Handle - Pneumatic Type

*"Surface Preparation Is Our Business"*

The PanBlast™ AirStop BSP Pneumatic Remote Control Handle is a non bleed type handle, which simply shuts off the signal air in the twinline hose to the blast pot control valve when the handle is in the un-activated state.

When activated, the AirStop Handle opens and allows the signal air to return to the control valve and thus activates the blast pot.

The PanBlast™ AirStop BSP Remote Control Handles are recommended for use with PanBlast™ Kombi Remote Control Valves.

## PanBlast™ AirStop BSP Pneumatic Remote Control Handle Assembly -
