PanBlast™ Tandem 1" NPT Air Control Valve

The PanBlast™ Tandem 1" NPT Air Control Valve is a rugged, cast iron, pilot operated, spring return diaphragm type valve, designed for use with blast pot remote control systems.

Ideal for use on pressure hold blast pots and multiple outlet blast pots, the Tandem Valve is normally located in the air pusher line and is used to turn the blasting compressed air supply on and off as required.

When combined with the PanBlast™ Corsa Abrasive Valve or similar, the Tandem Valve also allows the blast pot to feature an air blow down system. This is where the abrasive flow is shut off and the compressed air supply used to blow residual abrasive and dust from the blast cleaned component.

The PanBlast™ Tandem NPT Air Control Valve is also available in 3/4", 1 1/4" and 1 1/2" sizes.
