

## PanBlast™ Delta SNH Auto Suction Blast Gun

The PanBlast™ Delta Auto Suction Blast Gun is designed specifically for use on automated suction blasting machines. The lug which is cast into the gun body allows for the gun assembly to be firmly mounted on either a rigid bracket or a manipulation mechanism.

The SNH type Delta Gun utilizes lightweight ceramic blast nozzles, or can also be fitted with the more durable, but still lightweight boron type blast nozzle.

Both types of blast nozzles are available in a wide range of sizes to suit most applications.

### **PanBlast™** Delta Suction Gun Standard Features:

- \* Ergonomic, lightweight design for more efficient mounting and manipulation.
- \* Case hardened steel air tip for longer service life.
- \* Through hardened heavy duty air tip available as an option.
- \* Available with either boron carbide or ceramic blast nozzles.
- \* Mounting lug cast into the gun body for quick and simple attachment to mounting bracket and/or manipulator.
- \* Simple screw in blast nozzle retainer for quick and efficient nozzle changes.
- \* Available in a wide range of air tip/blast nozzle combinations which means there is a Delta Suction Gun to suit most compressor sizes.
- \* The Delta Suction Blast Gun can operate on virtually any abrasive media type and size.

### **Commonly Used Abrasives:**

- \* FastBlast™ Chilled Iron Grit
- \* PanaGrit™ Cast Steel Grit
- \* QuickCut™ Aluminium Oxide
- \* BrightBlast™ Glass Beads
- \* EnviroGrit™ Garnet
