

PanBlast™ AirFlo Remote Control Handle - Electric Type

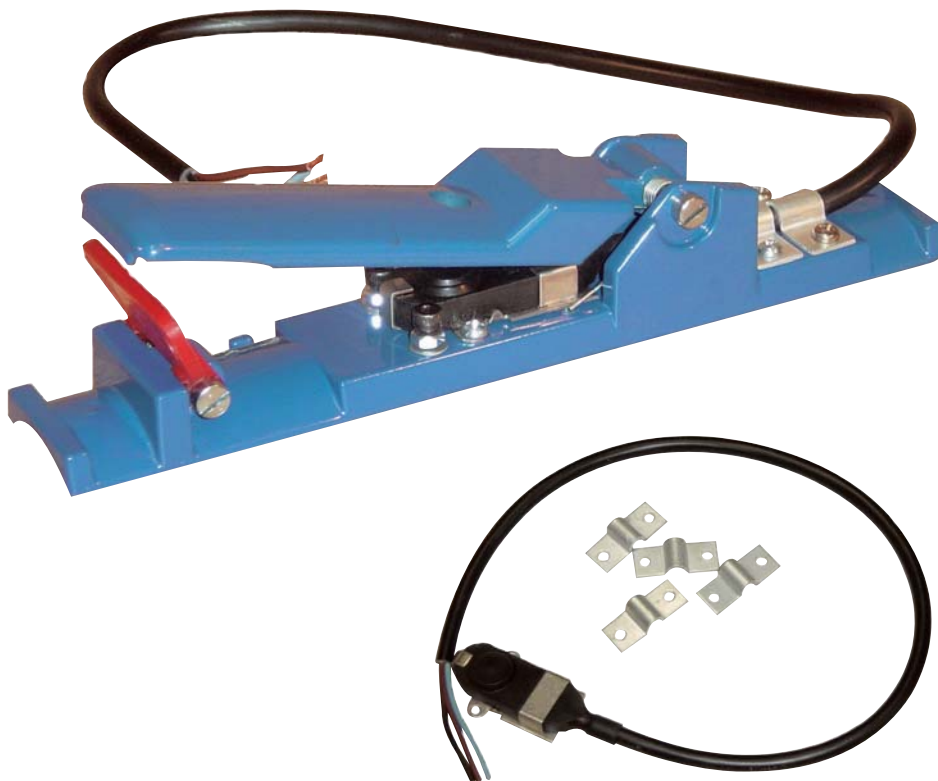

*"Surface Preparation
Is Our Business"*

Pan Abrasives manufacture and supply an extensive range of Remote Control Deadman Handles available in various configurations for both pneumatic and electrical operation.

The PanBlast™ AirFlo Electric Remote Control Handle operates as an electrical switch style handle. The AirFlo Electric Handle is connected to the blast pot control valve using either a 12 Volt or 24 Volt electrical cable arrangement. (Other voltages available upon request)

A new, improved electrical switch, in conjunction with a re-positioned handle arrangement, provides increased handle reliability and more effective operation.

When activated by the operator, the PanBlast™ AirFlo Electric Remote Control Handle switch sends an electrical signal to the solenoid control valve, which then in turn activates the remote control system control valve.

The PanBlast™ AirFlo Electrical Remote Control System is ideally suited to overcoming the signal delay problems associated with pneumatically operated control systems when operating over lengths in excess of 40m (130ft).
