

PanBlast™ Helix 100 BSP Inlet Control Valve

*"Surface Preparation
Is Our Business"*

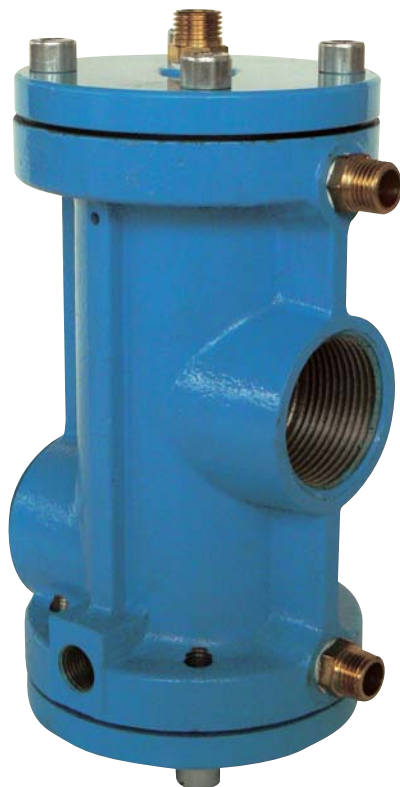

PanBlast™ Helix 100 BSP Inlet Control Valve

The PanBlast™ Helix 100 BSP Inlet Control Valve is a piston operated air control valve which is used to control the compressed supply into the blast pot and is designed to be used in conjunction with the Helix 50 BSP Exhaust Control Valve (or similar).

The PanBlast™ Helix 100 BSP Inlet Control Valve is designed to provide fast and effective operation. As soon as it receives a signal from the operators deadman control handle and both the valve itself, as well as all its parts, are fully compatible with the OEM RMS style valve.

Powder coated outer surfaces along with anodized internal parts, mean that the PanBlast™ Helix 100 Inlet Control Valve has a very high resistance to corrosion.

Featuring 32mm(1 1/4") ports, the PanBlast™ Helix 100 BSP Inlet Control Valve may also be combined with the PanBlast™ Helix 50 BSP Exhaust Control Valve, to create the Helix 150 BSP Remote Control Valve, which is a combined inlet and exhaust valve in the one compact assembly.
