PanBlast™ AirStop II Remote Control Handle - Electric Type
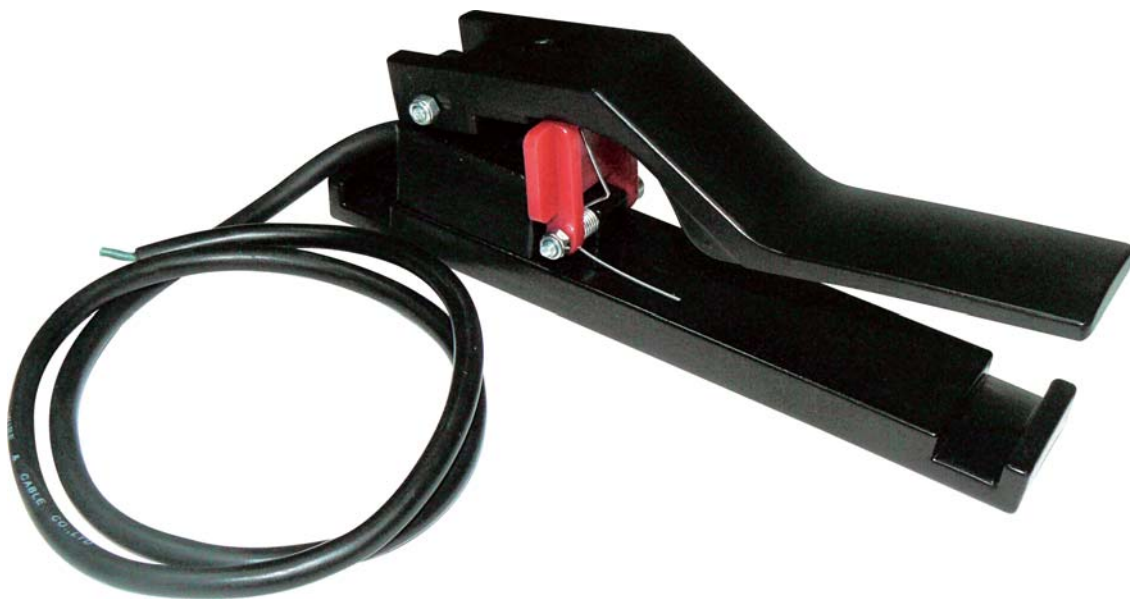

"Surface Preparation Is Our Business"

PanBlast™ AirStop II Electric Remote Control Handle

The PanBlast™ AirStop II Electric Remote Control Handle has all the same features as the AirStop II Pneumatic Handle, but operates using an electrical signal, normally 12 Volt.

The wide, flat style of lever, which features on the AirStop II Handle, overcomes many of the ergonomic problems which are sometimes apparent with control handles which use smaller levers.

A spring loaded safety lever lock, with a long travel, is also provided on the PanBlast™ AirStop II Remote Control Handle. This style of safety lock provides a much more positive locking of the handle than other plunger type locks, which makes accidental activation of the handle far less likely.

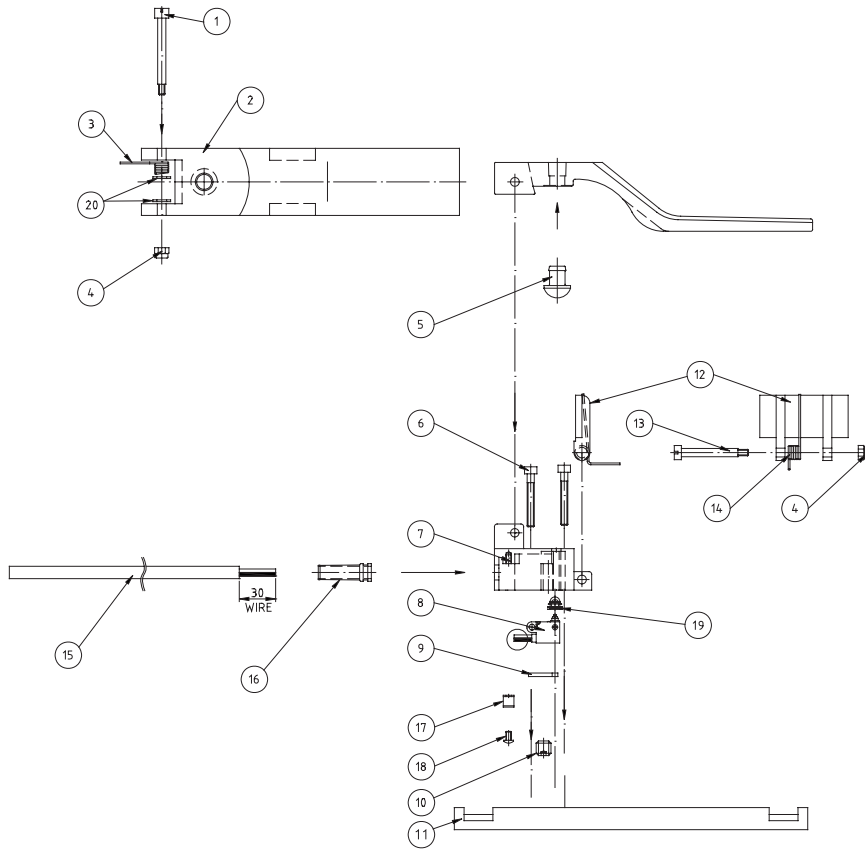

Blast Pots & Cabinets - Remote Control Valves - Abrasive Control Valves - Blast Nozzles - Nozzle Holders & Couplings - Helmets & Breathing Air Filters

PanBlast™ AirStop II Electric Remote Control Handle Assembly -

Stock Code	Description	Weight
